Cork Mosaic: What We Seek

The natural mosaic is here. **Habitus** presents Cork Mosaic. Cork is the forward-looking green material and **Habitus** leads the way in developing innovative applications that artfully expand its inherent and aesthetic qualities. At **Habitus**, our products are designed to complement a healthier way of life and our new mosaic line is part of a series of exclusive, award-winning ecological products that include furniture, fabric, flooring, wall covering, architectural moldings and more. Like all our cork products, Cork Mosaic is a renewable resource, literally recycled from the cork stopper industry's byproduct and then fashioned into sheets of circular patterns. And like most of our cork products, Cork Mosaic insulates and is water resistant, making it perfect for bathroom floors and walls, kitchens, children's rooms, music rooms, libraries and dens. When Cork Mosaic is installed, it simultaneously infuses a bathroom with warmth and sophistication, transforming a living space into the haven we all seek.

Cork Mosaic comes in 12" x 24" x 1/4" pre-mounted sheets that are adhered with parquet floor glue or with self-stick backing, then using the same grout for ceramic tiles. All Cork Mosaic is available in natural finish or with water based varnish. Ecological water based colors available by special order.

More Cork Info: Harvested from the bark of the Mediterranean oak tree, Cork is technically superior, effectively insulating air, sound and movement without harmful toxins. It is naturally warm to the touch and will always maintain a specific surface temperature of 70°. Cork is the natural alternative to synthetic materials, creating an organic living or working space, and promoting a healthy atmosphere. Cork and other outstanding materials are available exclusively through Habitus Inc. the premier architectural finishes company located at 166 E. 108th St, and can be reached by calling (212) 426.5500, fax (212) 426.5200 or by visiting their website at www.habitusnyc.com.
